

Compelling Conversations — Perspectives on the Quantum Science Revolution

A chat between three UCI quantum scientists about the future of their field.

Wednesday, April 07, 2021

UCI Physical Sciences Communications

Compelling Conversations

Perspectives on the
Quantum Science Revolution

James Bullock

Dean of the UCI
School of Physical
Sciences

**Javier
Sanchez-
Yamagishi**

Assistant Professor
UCI Department of
Physics & Astronomy

Bill Evans

Distinguished
Professor
UCI Department of
Chemistry

Sandy Irani

Professor
UCI Donald Bren School
of Information and
Computer Sciences

UCI School of
Physical Sciences

Join Professors [Javier Sanchez-Yamagishi](#), Bill Evans and Sandy Irani as they traverse the quantum realm in this latest episode of Compelling Conversations.

Welcome to another episode of Compelling Conversations. Just about two years ago, something new appeared at UC Irvine: [The Eddleman Quantum Institute](#). It's an institute that aims to stimulate quantum science research at the UCI School of

Physical Sciences, and in this episode, three researchers from the institute share their thoughts on the future of quantum science alongside host James Bullock, who's the dean of Physical Sciences.
