Then sit back and relax until Unlocky does his magic: calculating and generate your Apple unlock code. Let me explain you each step:

Send the IMEI number

Because our tool is working based on the cell phone's IMEI, guess what? you have to send your International Mobile Equipment Identity (IMEI) number through the app. Please pay attention when writing the 15 digits number, as this number is necessary to perform the unlock. Are we done? Let's move to the next step.

Select Country and Network

Once you complete the first step and your IMEI is connected with our database, you will be asked to select the country and network provider (carrier) which your phone is locked to. In case you don't know the carrier name that locked your device just select "WORLDWIDE" for both options, even it will be easier for us to know these details.
